

15 Of The World's Coolest Floating Homes

With rising sea levels, skyrocketing land prices and climate changes, floating homes and structures are emerging as an alternative to traditional housing solutions. While they are best suited for low-lying regions and are extremely popular in places like the Netherlands, the trend is fast catching on to other places. Since many tout them as the next big thing, I decided to list some of the coolest floating homes and structures out there. Some are just concepts, some are a reality but all are just pure awesome.
