TERRITORIAL EXPANSION - WATER STUDIO PROŠIRENJE TERITORIJE - WATER STUDIO

Text: Marko Stojčić

Kada pričamo o razumevanju teritorije u arhitekturi, i njenih potreba ali i novih mogućnosti, nezaobilazna tema je proširenje građevinskih površina. Dobar početak u stvaranju arhitekture, i što možemo imati još nešto što će objekat bude kvalitetniji i interesantniji, a to je svakako atipična građevinska struktura.

Primer Holandije i povećavanje građevinske površine u toj zemlji je opšte poznato slučaj. Štušivanje terena je skoro jedini prihvacični primer na koji se danas. Savremena arhitektura je u potrazi za atraktivnim ali i jeftinijim rešenjima, a to može biti gradnja na vodi.

Proširenje na račun vodenе površine ima svoje potporu i u procesu globalnog zagrevanja. Obzirom da će u narednih 20 godina potencijalno dobiti građevinska površina smanjiti, potpuno je opravdano da najam je toliko uzmemo nazad od vodenog teritorija, i to naročito zbog toga što će potreba za građevinskom površinom rasti. Ono što je nesumnjivo je da novi novog habitat-a osigura dešavanje u već razvijenim urbanističkim sredinama, kao prirodna potreba za proširenjem, dok će danas mlađe gradnje sredine i ostati bez vode.

U ovom broju prikazujemo najinteresantnije projekte holandskog biroa Waterstudio koji je specijalizovan za ovu vrstu arhitekture i čini se da je najdaljnji otisao na realizaciji realnih projekata čiji život se zasniva na vodenoj površini, which is based on water surface.
