status Completed works
type Modular/Prefabricated housing /

INFO

This plan was designed for an urban water-development area in Amsterdam. Since limitations of the building envelope and 2.5 storeys, while maximizing effective floor space for the principal, forced the designers to come up with a strong architectural principle that organized the dwelling with only modest means. The location at the end of the pier where the view should be focussed on the water while shielding off the dwelling from adjacent houses, provided the initial starting point. The architectural ...
