# Corian-Clad Pad in the Netherlands Could Be an Extra on Tron

BY **RACHEL B. DOYLE** | MAR 12, 2015, 11:00AM EDT

Photos by Waterstudio.NL via [Design Boom](#)

A couple years back, Disney used the space-age material Corian to build a [real-life version](#) of the futuristic house from the 1980s movie *Tron*. Now a firm in the Netherlands has clad a submarine-shaped home next to a lake with the material, for a very high-tech effect. Indeed, the [one-story home](#) with floor-to-ceiling windows by **Waterstudio.NL** has the rounded edges and elegant white shell of a living space created by Apple engineers.

Building in the rural location of Westland, Holland comes with rules about the permitted heights for structures. The resulting Corian-and-timber house is low to the ground, with a main entrance on the side of the volume, and a subterranean level that is obscured from the lake-side. "The concept of transparency was maintained throughout the house by creating an open layout where almost no doors are used," architect Koen Olthuis [writes](#). Photos, below:
